1966 PMM Editorial Index

DIE CASTINGS

After the Die Casting Is Trimmed ... July p. 53
Aluminum Die Castings for Aircraft and Missile Application ... Feb. p. 34
Analog Computer to Analyze Die Casting ... May p. 88
Automatic Casting of Precision Miniature Zinc Components ... May p. 73
Automatic Die Casting in the Toy Industry ... Sept. p. 74
Automatic Vibratory Finishing of Die Casting ... Jan. p. 81
Case for Integrated Die Casting/Finishing Facilities ... Sept. p. 68
Cast Dies Meet Crash Schedule ... May p. 12
Cold Chamber Die Casters Get Automatic Metal Pouring ... Nov. p. 88
Design for Paintability ... Dec. p. 52
Design Secrecy ... Sept. p. 32
Designer's Portfolio ... Oct. p. 45
Diary of Three Die Castings, The ... Nov. p. 67
Die Casting Gets a New Tool ... Sept. p. 90
Die Casting Industry: 1965-1966 ... May p. 59
Die Casting Machine Sales Set a New Record ... May p. 63
Die Casting Non-castable Aluminum Alloys ... Mar. p. 61
Die Casting the Ferrous Metals ... June p. 58
Die Castings and P/M Parts Insure Trouble Free Operation ... July p. 47
Die Castings in the Nike Hercules Missile ... June p. 53
Die Castings Simplify Electrical Switches ... Sept. p. 67
Dies Are in Use 34 Years ... Nov. p. 108
Eliminate Qualification with Die Castings ... June p. 63
Extruded Inserts Broaden Applications for Die Castings ... June p. 50
Finned Heating Grid Is a One-Piece Die Casting ... Dec. p. 39
Five-piece Assembly Wins Zinc Die Casting Award ... Oct. p. 63
For Accessories, Stylists Specify Zinc Die Castings ... July p. 42
Good Design Just Starts on the Drawing Board ... Oct. p. 56
High Visual Appeal for Hi-Fi Panels ... Dec. p. 33
Home Appliances—Number Two User of Zinc Die Castings ... Mar. p. 68
How Die Casting cuts Machining Costs ... July p. 43
Induction Melting of Aluminum for Die Casting ... Aug. p. 36
Industrial End Uses of Die Castings—1965, The ... May p. 65
Is Die Casting An Art or A Science? ... Oct. p. 22
More Efficient Metal Handling ... Mar. p. 62
More Zinc on 1966 Autos ... Jan. p. 41
New Fire-resistant Hydraulic Fluid, A ... April p. 64
New Protective Coating for Nonferrous Metals ... Nov. p. 111
New Technique for Internal Threads in Die Castings ... May p. 11
No Time for Rework ... Oct. p. 67
Quality Castings Demand Good Temperature Control ... Jan. p. 59
Recording Instrumentation: A Valuable Die Casting Tool ... Jan. p. 54
Refractory Metals Are Different ... Feb. p. 31
Simple Control System Verifies Die Casting Production ... Mar. p. 64
Small Die Castings by the Bushel ... Jan. p. 64
State of the Industry ... May p. 51
Status Report on Recording Instrumentation ... Mar. p. 66
Substitute for Chromium Plate? ... Nov. p. 116
Surface Condition Die Castings Before Plating ... May p. 75
Ultrasonics for Die Casting Machine Maintenance ... Mar. p. 63
Value Analysis Helps Die Casters ... June p. 93
Vibratory Deburring of Die Castings ... April p. 67
Visit to Checker Motors, A ... June p. 56
Way to Get Good Looking Die Castings at Low Cost, A ... Nov. p. 106
What Buyers Need to Know ... Nov. p. 56
What Industry Will Use in 1966 ... May p. 52
What You Should Tell Your Die Cast Die Builder ... Dec. p. 47
Which Chromium Plate for Your Zinc Die Castings? ... Feb. p. 50
Work Together and Save ... April p. 36

EXTRUSIONS

Aluminum Extrusion Industry, The ... May p. 71
Cross Flow vs. Longitudinal Flow Extrusion Aging Ovens ... Jan. p. 48
Design for Paintability ... Dec. p. 52
Design Pointers for Aluminum Extrusions ... Jan. p. 67, Part I, Feb. p. 45, Part II, Mar. p. 48, Part III
Designer's Portfolio ... Oct. p. 45
Extruded Inserts Broaden Applications for Die Castings ... June p. 50
Few Minutes, Please, A ... Oct. p. 80
Finishing Aluminum Extrusions ... Aug. p. 45
High Visual Appeal for Hi-Fi Panels ... Dec. p. 33
How Extrusions Increase Payload ... Nov. p. 79
New Fire-resistant Hydraulic Fluid, A ... April p. 64
New Ways to Utilize Aluminum Extrusions ... Aug. p. 40
Think Extrusions before Designing ... June p. 54
Unique Movable Runout Belt for Extrusion Production ... July p. 38
Visit to Checker Motors, A ... June p. 56
What Industry Will Use in 1966 ... May p. 52

FINISHING

After the Die Casting is Trimmed ... July p. 53
Automatic Vibratory Finishing of Die Casting ... Jan. p. 81
Case for Integrated Die Casting/Finishing Facilities ... Sept. p. 68
Design for Paintability ... Dec. p. 52
Designer's Portfolio ... Oct. p. 45
EDM—A Production Tool for Investment Casters ... June p. 65
Mechanical Plating—A New Finishing Technique ... Mar. p. 71
No Time for Rework ... Oct. p. 67
Protective Coating for Non ferrous Metals ... Nov. p. 111
Rapid-gelling Shell Casting Investment, A ... Nov. p. 98
Substitute for Chromium Plate? ... Nov. p. 116
Surface Condition Die Castings Before Plating ... May p. 75
Vibratory Deburring of Die Castings ... April p. 67
Water reducible coatings for Metal Parts ... Sept. p. 83
Which Chromium Plate for Your Zinc Die Castings? ... Feb. p. 50

FORGINGS

Automatic Forging . . . for economical mass reproduction ... Feb. p. 27
Automatic Induction Heater for Automotive Forging Blanks ... Feb. p. 10
Brass Forging Makes Scuba Gear Fail-Safe ... Dec. p. 35
Can Your Component Designs Be Forged-Economically? ... Mar. p. 54
Checklist for Forging Inquiries ... Sept. p. 60
Closed Die Forging Sets New Records ... May p. 66
Deep Diving Aluminum Forgings ... Jan. p. 14
Defects—More Costly After Machining ... Aug. p. 58
Designer's Portfolio ... Oct. p. 45
Do's and Don'ts for Forging Designers ... Jan. p. 45
Forging Industry Sets New Record ... Mar. p. 53
Forging Metallurgy—Steel ... Oct. p. 41, Part I, Nov. p. 101, Part II, Dec. p. 49, Part III
Forgings—Who Should do Machining? ... Sept. p. 64
High Energy Forming Yields High Savings ... Nov. p. 93
Latest on "Zero-draft" Forgings ... Mar. p. 49
Lubrication During Hot Forging of Steel ... Mar. p. 56
Manipulator is Semi-automatically Keyed to Forging Press ... July p. 37
Metallurgy of Aluminum Forging, The ... Aug. p. 29, Sept. p. 70
New Fire-resistant Hydraulic Fluid, A ... April p. 64
Press Forging vs. Machining ... July p. 40
Principal Technical Development Needed by the Forging Industry, The ... Sept. p. 98
Rapid Transit Goes Aluminum ... Jan. p. 14
Resistance Heating for the Forge Shop ... Feb. p. 29
Steel Forging Ends Ductile Iron Machining Rejects ... July p. 49
"Super Alloys" for Forging Dies ... Nov. p. 80
Titanium Forgings Combine Strength and Weight-Savings ... Jan. p. 62
Transfer Unit Ups Forge Ups Forge Press Output ... Dec. p. 45
Use Forgings in Roller Skates? ... June p. 48
Valve Bodies by Forging ... April p. 62
Visit to Checker Motors, A ... June p. 56
What Industry Will Use in 1966 ... May p. 52
Where Castings are Marginal—Use Forgings ... Mar. p. 57

GENERAL ARTICLES

Buyers Comment on "One Quote" Idea ... Sept. p. 62
High Cost of Hurry-Up ... Sept. p. 53
Value Added by Manufacture ... Sept. p. 54
What Industry Will Use in 1966 ... *May p.* EB

INVESTMENT CASTINGS

Aircraft Use of Aluminum Investment Castings ... Dec. p. 40
Cast-Metal Heart, A ... Jan. p. 13
EDM—A Production Tool for Investment Casters ... June p. 65
High-strength Aluminum Investment Castings ... Aug. p. 32
How to Simplify Designs—Use Investment Castings ... Feb. p. 40
Lead Time & Tooling Costs ... July p. 45
Locomotive Window Bracket ... June p. 92
Machinery—Improved with Investment Casting ... Jan. p. 76
Plant Expansions Throughout the Growing Investment Casting Industry ... May p. 69
Preformed Ceramic Cores for Non-ferrous Metals Casting ... April p. 60
Problems in the Production of Large Investment Castings ... June p. 61
Quality Castings Demand Good Temperature Control ... Jan. p. 59
Superalloy for Use at 1400° F ... Jan. p. 13
What Industry Will Use in 1966 ... May p. 52

PERMANENT MOLD

Continuous-Cast Copper-Base Alloys ... Jan. p. 52
Quality Castings Demand Good Temperature Control ... Jan. p. 59
What Industry Will Use in 1966 ... May p. 52

PLASTER MOLD CASTINGS

Quality Castings Demand Good Temperature Control ... Jan. p. 59
What Industry Will Use in 1966 ... May p. 52

POWDER METALLURGY

Auto Maker Explores Larger P/M Parts ... June p. 43
Continuous Sintering Furnace for P/M Parts ... Mar. p. 113
Designer's Portfolio ... Oct. p. 45
Die Castings and P/M Parts Insure Trouble Free Operation ... July p. 47
High Compressibility Steel Powder ... Sept. p. 77
Improved Corrosion Resistance of P/M Stainless Steels ... July p. 35
Improved Iron Powder, An ... April p. 56
Infiltrated Iron Pump Cylinder Blocks ... Jan. p. 71
Iron Powder with Low O2 Content for Structural P/M Parts ... Oct. p. 59, Part I, Nov. p. 82, Part II
P/M Presses Must Be Versatile ... April p. 58
Porous P/M Part Ups Surface area 11,200% ... June p. 47
Powder Metal Parts Contest Winners ... July p. 50
Powder Metallurgy—An Explosive Industry ... May p. 57
Processing Iron Powder Parts in Hydrocarbon Atmospheres ... April p. 52
Sintered Metal Friction Materials ... Feb. p. 42
Special Alloys by Powder Metallurgy ... April p. 54
Sprockets with Smooth Finish at Half Cost ... Nov. p. 3
Stainless Steel Flow Control or Filter Elements ... Dec. p. 42
What Industry Will Use in 1966 ... May p. 52
